

DW800 It's safe to venture away from your desk

- ▶ Move up to 150 meters* from a desktop or wall-mounted docking station
- ▶ Dynamic Volume Control™ raises or lowers the volume to achieve the exact, preset comfort level
- ▶ Swap empty mobile unit while the system holds the call
- ▶ Batteries charge faster than they deplete, providing infinite battery lifetime

Compatible with any Sennheiser Communications telecom headset, the wireless system lets you move around the office while on the phone.

- ▶ Sound Clarity System™ improves speech intelligibility
- ▶ Conference-call feature allows up to five people to take part in an internal phone conference. Four people plus one outside caller can confer simultaneously.
- ▶ Push-to-talk function (PTT) enables the user to speak while pushing the button, whereby releasing mutes the microphone. Ideal for professional applications e.g. in control rooms, etc.
- ▶ Intercom function allows parties using mobile units to communicate independent of the telephone line
- ▶ Optional accessory TCI 01 supports handset lifters and allows answering and terminating calls away from desk
- ▶ Use frame of docking station to hold while on desk or convert to headset holder when mounted to wall

* Depending on the operational environment and up to 300m in the line of sight
