Change the way your office talks

## Talk smart. Go wireless.

**Working freedom** The hectic tempo of modern office life places extreme demands on you. You're expected to do increasingly more, do it quicker and communicate it clearly and accurately.

GN Netcom has developed the GN 9300 series to help you meet these demands with ease. Designed to change the way you use your telephone, the GN 9300 series will untie you from your desk, allowing greater comfort and increased

productivity. Free yourself from the restrictions of your telephone handset and improve your working efficiency.

GN Netcom would like you to step into a different office environment, a wireless one. Your desk will no longer impede you; move hands-free and unhindered throughout the day. If you want to improve the way you work:

Talk smart. Go wireless.

**Changing the way you talk** The new GN 9300 series of wireless office headsets marks the latest in a long line of innovations GN Netcom has introduced over the years, and they will change your office forever. Leading this revolution is the high-performance GN 9350, the ultimate example of wireless headset functionality. This headset is an industry first; the first to provide Digital Signal Processing (DSP) enhanced sound clarity, the first with wideband IP sound and the first in range and style. For use

with both traditional desk phones and IP telephony, the dual connection GN 9350 always meets your needs.

Feel the benefits of hands-free efficiency and a feather-weight, ergonomic design. Each of the 3 new GN 9300 series headsets is a groundbreaking, stylish product designed to push all the boundaries. Whatever your needs there's a GN 9300 that's made to suit you. Office conversation has just changed forever.

## The GN 9300 Series: Headsets have never sounded so good

### GN 9350

#### Style and superior sound. Wireless desk and IP telephony.

- Dual connection – for desk phone and computer-based IP telephony
- 6.8 kHz wideband sound in IP mode
- DSP-enhanced audio quality
- Noise-cancelling microphone
- Digital security encryption
- Up to 9 hours of talk time
- Up to 100 m range in an office environment
- 3 wearing styles included
- Conference call capability
- Lightweight 26 gram design

## Talk smart. Go wireless.

**Superior sound** The GN 9300 series headsets provide you with crystal-clear, peak-free sound. A noise-cancelling microphone guarantees clear voice transmission, even in noisy environments. The GN 9350 uses Digital Signal Processing to purify the incoming signal, enriching sound quality, and IntelliTone™ ensures there's always a safe consistent volume level.

**Increase your range** The freedom to move around the working environment is essential, increased mobility reduces stress and improves efficiency. All GN 9300 series headsets allow you to interact with colleagues within a range of up to 100 metres, enabling you to exchange and refine ideas throughout the office space.

**GN 9330 USB**  
**Wireless IP telephony. Wideband sound.**

- 6.8 kHz wideband sound
- Noise-cancelling microphone
- Digital security encryption
- Up to 6 hours of talk time
- Up to 100 m range in an office environment
- 2 wearing styles included
- Lightweight 26 gram design

**GN 9330**  
**Lightweight design. Wireless productivity.**

- Noise-cancelling microphone
- Digital security encryption
- Up to 9 hours of talk time
- Up to 100 m range in an office environment
- 2 wearing styles included
- Lightweight 26 gram design

[www.gnnetcom.co.uk](http://www.gnnetcom.co.uk)

**Work in comfort** The more comfortable you are, the more productive you are. The GN 9300 series eliminates the neck and muscle pain caused by cradling a traditional telephone handset between your neck and shoulders. Your optimum physical comfort is assured through a choice of wearing styles to match your preference, and a lightweight, ergonomic construction allows you to feel at ease throughout the working day.

**Time to talk** The GN 9300 series headsets offer more than enough talk time for an entire working day. An optional second battery can be kept charged in the base unit and be hot-swapped during calls to provide around-the-clock talk time. So whichever model suits you best, you can talk and move freely, without the worry of being cut off.

**Headset in stand** The small size and sleek stylish look of all the base units in the GN 9300 series ensures they'll fit perfectly on the surface of any desk. Headsets are docked in the stand in order to charge batteries and in the GN 9350, to join conference calls.

**Boom-arm** The GN 9300 series' noise-cancelling microphone ensures your voice is always transmitted clearly, even in noisy environments.

**Talk button** Answer calls by pressing an easily reached, stylish talk button; the link indicator will then light. The GN 9350's talk button is also used to join in on conference calls – secondary headsets just have to dock and press.

**Parameter control** The GN 9350 base unit's LCD display allows you to tailor an extensive range of parameters to your own specific needs:

- Transmit volume setting
- Remote handset lifter selection, Electronic Hook Switch (EHS) compatible
- Range/power selection
- Treble/bass selection
- Automatic control of audio output (IntelliTone™)

**Maximise communication convenience** The GN 1000 Remote Handset Lifter is the perfect accessory for your GN 9300 series headset. Using the lifter enables you to answer and end calls while away from your desk. The GN 9350 also supports Electronic Hook Switch (EHS)\*, which facilitates remote hooking on or off of calls, without the use of a GN 1000 RHL.

\*Only applicable on selected™ telephones

**Talk smart. Go wireless.**

**Wearing styles** Choose from three interchangeable wearing styles\*, and enjoy a lightweight, comfortable fit.

\*GN 9350: Ear hook, headband and neckband included as standard  
GN 9330 and GN 9330 USB: Ear hook and headband included, neckband available as accessory

**Base unit** The GN 9330 base unit could not be simpler to setup. An easy-to-operate slide control facilitates dial tone adjustment. After securing a clear, audible dial tone the microphone volume wheel can be used to set the transmit volume of your voice, ensuring that the conversation will be heard properly at both ends of the line.

**Slide switch and speaker** The slide switch volume control is found intuitively and is simplistic in operation, allowing you to adjust headset speaker volume during a call or mute the outgoing signal.

**IP** The GN 9350 is unique in its capacity to offer both desk phone and IP telephony (soft phone) connections. This dual connection capability means you have the ability to move with technology and enjoy the benefits of both. The USB ports in the GN 9350

and in the IP specific GN 9330 USB facilitate easy connection to your computer; subsequent IP calls can then be automatically routed from the computer to the headset.

GN Netcom is the leading provider of innovative wireless and corded headsets. Our award-winning portfolio includes many industry firsts, such as the first wireless office headset, the first Bluetooth® headset, and the first wireless multi-use headset for both conventional and IP telephony. Designed for professionals in offices and contact centers. Our stylish products provide increased efficiency and mobility, as well as enhanced personal comfort. GN Netcom is a division of GN Store Nord, the world's largest manufacturer of headsets for offices, contact centers, and mobile phones. GN Store Nord is headquartered in Copenhagen, Denmark.
