SupraPlus™ Wireless

Efficiency in the office

A wireless headset is the ultimate in efficiency and freedom for the increasing numbers of office-workers who spend long periods on the phone. The SupraPlus Wireless from Plantronics offers absolute comfort, outstanding sound-quality and a number of well-thought out features, based on our unrivalled experience in this area.

The quick pair feature, for example, means that a compatible headset can be paired – at the click of a button – with a single base. This means that hot-desk, or shift workers can keep their own personal headset, and use it at any desk where there is a base.

The 100-metre wireless range (up to 50 metres in a typical office space) makes this the perfect solution for helpdesk workers, for example, who are often away from their own desks, but need to remain available at all times. And call-centre professionals, who need the comfort as well as the ability to focus on the call against a noisy background, will appreciate the ergonomic design and the noise-cancelling, binaural version.

If you are amongst the many people who now make lengthy conference calls, the SupraPlus Wireless headset from Plantronics means you can simultaneously write or type notes, access papers, or even just relax and enjoy your coffee, whilst talking business.

Key features

- Extremely comfortable for all-day wearing
- Binaural noise-cancelling version for noisier environments
- Quick pair feature allows multiple headsets to share one base for effective hot-desking or multi-shift working
- DECT™ technology for excellent sound quality
- 100-metres' range – up to 50-metres in a typical office
- Up to 9 hours' talk-time, 50 hours' standby time, with fast recharge
- Remote call-answering when away from your telephone*
- Dedicated headset volume and mute control, including on-mute indicator
- Quick call feature for short-call convenience
- IntelliStand™ automatically answers call when headset is picked up from base*

*Requires HL10 or electronic hook-switch control

Sound Innovation™ for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man..." From the man on the moon to the man on the street, Plantronics is an innovation leader dedicated to creating communication solutions for people who understand and appreciate the real freedom of space. From outer space to inner space, find your space.
